

2017 Rochester Garden Club Geranium ^{Plus!} Sale

Join us as we celebrate our 52nd year of blooms! Our Annual Sale allows us to fund community beautification and educational projects in the Rochester and surrounding areas. Our most recent project, marking our 100th Anniversary, was underwriting the new hard-scape which now defines the famous Pansy Bed in Highland Park. Some of our projects include Greentopia, the Discovery Garden at The Strong Museum, The Eastman Museum, Ronald MacDonald House, and St. Joseph's Villa. Your purchases make these possible and the entire Community benefits from them. Thank You!

- 2.0mm, heat-treated steel head
- Head: 5" L x 4.5" W, Total: 21" L
- Double riveted chrome collar
- Dimensions: 46" L x 6" W

GERANIUMS IN 9 COLORS!

GERANIUMS- Height: 1-2 ft. Light: Bright light to full sun. Water: Water thoroughly, then allow the top 1 inch to dry out before watering again. Use a pot with drainage holes to prevent soggy soil. Geraniums are known to repel earworms, cabbageworms, and Japanese beetles. Because of this, they make great companion plants. They combine happily with our Green Spikes, "Goldilocks" (Lysimachia), Sunpatiens®, Lantana, and Petunias.

WHITE

CRANBERRY

STRAWBERRY SIZZLE

CORAL

SALMON

DARK RED

VIOLET *New!*

LIGHT PINK

LILAC

LOBELIA SKY BLUE

Soft blue flowers all season on cascading, well-branched plants; good summer performance; low maintenance, Best Seller & Award Winner. Deadheading not necessary. Attracts butterflies. Height: 6 - 12 inches, Trails up To 24 inches, Spread: 12 - 24 inches. Light Requirement: Part or full sun. Lobelia does not like "wet feet". Be sure that you do not keep the soil wet. Allow the soil surface to dry before watering again. These newer types of Lobelia are much more heat tolerant than past plants. They will reliably bloom in warm temperatures and are bred to take the summer heat better than typical lobelia.

*Pictured right:
Lobelia Sky Blue
Sunpatiens® Blush Pink and
Goldilocks (lysymachia/Creeping Jenny)*

SUNPATIENS® are revolutionary hybrid impatiens. These remarkable plants represent a break-through in flower breeding: robust, sun-loving, heat-loving impatiens that thrive in full sun or part shade and deliver continuous color from spring through frost. Whether used in baskets, window boxes, patio pots or in the landscape, these beautiful plants combine massive flower power with tough, low-maintenance plants that flourish almost anywhere. Plant in well-drained soil if you are re-potting into larger containers or baskets. Water plants well after planting and keep the media evenly moist until plants are established (7-10 days). If plants wilt after they are established, simply water well and they should revive within 24 hours. New leaves and new flowers will cover old blooms, so you don't need to remove old flowers or cut off older growth. We offer them in 3 colors:

BLUSH PINK

WHITE

MAGENTA

LANTANA LEMON ZEST

Heat and drought tolerant. Attracts butterflies.
Height: 12 - 26 inches. Spread: 12 - 24 inches. Needs full sun.
Lantana groups well with Geraniums, Petunias, Lobelia, and Goldilocks (Creeping Jenny/Lysimachia) -just to name a few.

New!

“SHADEPATIENS” (New Guinea Seed Impatiens)

Perfect for bedding or pots in shade and a great substitute for the old-fashioned varieties that are now too susceptible to blight. They are sometimes called "Busy Lizzies" for their ability to bloom for months on end. Height: Up to 15 in. Light: Keep shaded from hot, direct sun in summer. Water: Keep the soil evenly moist, but not soggy.

RED VIOLET

LAVENDER

ORANGE

DRAGON WING BEGONIA - ROSE

These are the perfect plants to fill large spaces in beds or containers because they get big quickly!
Sun exposure: Sun to partial shade. Height & Width (both) 18-24 in. Leaves are shiny/glossy-textured.
This plant is attractive to bees, butterflies, and/or birds. Water regularly; do not over water.

GREEN SPIKE

What a difference a spike makes in a container! The planter on the right is just his best friend! Spikes to the rescue! They start sun and are widely adaptable to all types of soil. They grow between 18 and 24 inches tall, just as wide.

SOLD OUT

WAVE® PETUNIA

Wave Petunias are so low-maintenance that you don't have to cut the plants back or remove dead flowers. The faded blooms will dry up and drop off the plants on their own, with more appearing continuously all season long. Choose a bright location with at least 6 hours of direct sunlight. Don't let them dry out between waterings. If possible, water your plants in the morning so the foliage dries before the heat of the day sets in.

WAVE PETUNIA® PURPLE

WAVE PETUNIA® WHITE

WAVE PETUNIA® DOUBLE PINK
New!

New!

PETUNIA PAPAYA (POTUNIA®)

A large sized, single flowering petunia in a tropical shade of papaya-orange with a hint of cantaloupe melon. It grows in a compact, rounded habit that bounces back nicely after rain and is humidity tolerant. Potunia® varieties are self-cleaning types, that boast bold color all growing season and improved drought tolerance. They make excellent landscape plants and look wonderful in sunny, hanging baskets, and mixed container gardens. Height: 10", Width: 18". Plant in full sun. Do not over-water. Attracts hummingbirds and butterflies.

New!

BROWALLIA 'Blue Bells' (Bush Violet)

An under-used, under-appreciated annual flower with nickel-sized, five-petal, rich-purple flowers, Browalia blooms all summer. Flowers have white throat. Grows about 2 feet tall. Stays fairly upright in the ground but develops an arching habit later in season, especially in pots. A great choice massed in a pot or a border. Ideal in morning sun or afternoon shade. Good substitute for impatiens in a color not found in impatiens. Partial sun, partial shade, Height: 1'-2', Width: 8"-10". Petunias and Geraniums are good companion plants.

GOLDILOCKS (Creeping Jenny/Lysimachia)

The chartreuse, trailing shiny-golden foliage brightens any garden or container and is a great combination/filler plant but can also be stunning on its own. The brilliant color lights up any corner of the garden! Small, bright yellow flowers. Award winner, deer resistant. Perennial in our zone. Height: 2 - 4", Spread: 12 - 24". Part sun to sun.

WORM POWER Organic All Purpose Plant Food

This 1-pound bag is an excellent size for patio gardeners, or those with small garden beds and indoor plants. Each 1-lb bag contains enough Worm Power to transplant or feed up to 32 plants growing in 4" to 1 gallon containers. Add to potting mix, use in raised beds, or top-dress your plants. Worm Power will help lessen transplant shock and expand the root zone during critical growth stages. Worm Power creates a robust soil ecosystem enhancing your plants vigor and growth! Worm Power is produced by local worms in Avon, New York.

We recommend adding Worm Power to every plant we sell!
